Dream Career

Write your dream for your career. Be specific. Describe in detail. Picture a movie: what does it look like, sound like, smell like, taste like, feel like? Who is there? What do you do? What do you achieve? What makes it your dream? Be especially attentive to how you would feel living your life this way… living your dream out loud!

Tips to remember:

Write your dream in the present tense, as if you're currently living it.
Be bold. Be fearless. Dream BIG, and if you aren't freaked out enough, dream bigger. Be afraid to fail, and write those things down!
Create something you can believe in and support.
Inspire yourself, probably in a way that feels scary and maybe a tad embarrassing, because you're actually saying these dreams out loud. Um, hello vulnerability!
